Decimals, Fractions and Percentages - Math Is Fun From Percentage to Fraction. To convert a percentage to a fraction, first convert to a decimal (divide by 100), then use the steps for converting decimal to fractions (like above. Converting percents to decimals & fractions example (video ... Actually, I said I would do the decimal first, but we can start putting it into a fraction first. 18 per 100 as a fraction literally means  $18/100$ . We're literally doing the fraction first. This literally means 18 per 100, or 18 hundredths. Converting Between Decimals, Fractions, and Percents ... In other words, I have to move the decimal point two places to the left when I convert from a percent (50%) to a decimal (0.50). To do any other percent-to-decimal conversion, I move the decimal point the same number of places in the same direction, and drop the "%" character.

Fraction to decimal and percent Fraction to decimal and percent, step by step, example. For all free math videos visit <http://Mathmeeting.com>. Converting - Fractions, Decimals, and Percents Step 2: Move the decimal point two places to the right (to convert the decimal into a percent). Example:  $73 = 0.42$  Now, to change the decimal to a percent, move two spaces to the right.  $= 42\%$  3. Decimal to Fraction: Step 1: Drop the decimal point. Step 2: Place the decimal part over a denominator equal to its place value. Step 3: Reduce. 4. Converting Fractions, Decimals, and Percents - Fact Monster A decimal to a fraction: Starting from the decimal point, count the decimal places. If there is one decimal place, put the number over 10 and reduce. If there are two places, put the number over 100 and reduce. If there are three places, put it over 1000 and reduce, and so on.  $0.25 = 25/100 = 1/4$  A decimal to a percent: Move the decimal point two places to the right.
